[1. Probes for Microimaging The Nervous System](#)

Release Date: 12-19-2008Open Date: 03-05-2009Due Date: 01-08-2012Close Date: 01-08-2012

Background An emerging area of scientific opportunity is the design and use of probes to study structure and function at the molecular and subcellular level in living cells. Approaches and tools such as labels that attach to specific peptide or nucleotide moieties, Fluorescent Resonance Energy Transfer, Green Fluorescent Protein (and mutant color variants), and genetically-engineered voltage or ...

[2. Tools for Germplasm Cryopreservation](#)

Release Date: 12-18-2008Open Date: 03-05-2009Due Date: 01-08-2012Close Date: 01-08-2012

Tools for germplasm cryopreservation have become increasingly important in enabling repositories to meet the needs for establishing banks of animal germplasm for current and future research needs. This funding opportunity announcement (FOA) solicits applications from SBCs for Small Business Technology Transfer (STTR) projects that propose innovative research in the areas of animal germplasm cryopr ...

[3. Development of Biomarkers for Mental Health Research and Clinical Use](#)

Release Date: 12-12-2008Open Date: 03-05-2009Due Date: 01-08-2012Close Date: 01-08-2012

Background Biomarkers are objective, measurable biochemical, genetic, or other biological indicators of a physiological or disease process. While some individual biomarkers are useful in biomedicine, complex conditions, such as mental illness, might benefit from constellations of several different biomarkers being used in concert. Whether used alone or in conjunction with others, biomarkers coul ...
